Minnesota Rules Chapter 1300.0120 requires that “an owner or authorized agent who intends to construct, enlarge, alter, repair, move, demolish, or change the occupancy of a building or structure, or to erect, install, enlarge, alter, repair, remove, convert, or replace any gas, mechanical, electrical, plumbing system, or other equipment, the installation of which is regulated by the code; or cause any such work to be done, shall first make application to the building official and obtain the required permit.”

Performs building, plumbing, electrical, and mechanical inspections for all residential and commercial projects.

Performs Comprehensive Plan Review for both residential and commercial projects. Code deficiencies identified at plan review, before lumber has been cut or concrete poured, saves time in the construction process and saves money for both property owners and contractors.
