

SIGNS

	his handout is intended only as a guide. It shall not be considered a complete set of requirements.
≻ N	laterials and installation must comply with the current Minnesota State Building Code and the
n	nanufacturers' installation specifications for each product.
≻ N	lost municipalities have zoning standards regarding signs and require approval by the zoning
а	dministrator or municipal governing body. Zoning approval for a sign only authorizes the sign
	esign and/or planned placement – it does not substitute for a building permit.
> A	building permit is required if a sign is to be mechanically fastened to a structure or installed on
ir	ndependent supports. Electronic signs also require a separate electrical permit.
BUIL	DING Permit Submittal shall include:
	Building Permit Application, completed in its entirety, including signature and valuation.
	One set of plans showing the proposed design, including:
	Attachment detail Elevation drawings
	Sign area & size Materials
	Post sizing (if applicable) Footing details (if applicable)
	Weight, per independent component or section
	A site plan (or Certificate of Survey if required by municipality) identifying proposed sign location
	and dimensions, lot lines, setbacks, and all structures on the property
	☐ Engineering may be required for any sign; but is always required if:
	The sign is 7' above grade (if independently supported); OR
	Any sign component is fastened to a structure, but not attached to the structural frame; OR
_	Any sign component weighs over 50 lbs. and is fastened to the structure.
	IF NONE OF THE ABOVE APPLY, complete and return the Commercial Sign - General Scope of
_	Work form (included in this handout).
	Additional information may be required by the plan reviewer.
P	ERMIT CARD AND APPROVED PLANS (throughout the project) shall be:
POS	TED prior to start of work - <u>VISIBLE</u> from street or driveway - <u>ACCESSIBLE</u> to the inspector
	INSPECTION REQUIREMENTS:
_	

Inspections **MUST** be scheduled during office hours **AT LEAST** one business day prior to inspection. If a specific date and time is required, additional notice may be needed. Failure to cancel a scheduled inspection may result in a reinspection fee.

- Office Hours: Monday Friday 8:00 a.m. 4:30 p.m.
- Phone: (952) 442-7520 or (888) 446-1801

Inspections: (Refer to your permit card regarding project-specific inspections)

- 0 Footings (if applicable): After forms and reinforcing are in place, but PRIOR TO POURING CONCRETE. Locate survey stakes to allow inspector to verify setbacks.
- Attachment (may be included with final): Verify attachment according to approved plans, and that all 0 penetrations have been properly sealed.
- Final: After the sign has been fully installed. If sign includes electronic elements, the electrical final 0 inspection must be completed before the sign final inspection.

NOTICE: Construction or work for which a permit is required shall be subject to inspection by the Building Official, and such construction or work shall remain accessible and exposed for inspection purposes until approved. It is the responsibility of the permit applicant to be in attendance on site and provide access to the Building Official for all required inspections. If work is concealed and/or work is not complete at time of inspection, an additional inspection is required and a reinspection fee may apply.

Note: For specific code requirements, please contact the Building Inspection Department at 952-442-7520 or 888-446-1801 or e-mail: info@mnspect.com.

PROJECT CHECKLIST:

The following is a guideline to assist in compliance with the requirements of the MN State Building Code.

BEFORE YOU DIG, contact Gopher State One Call to locate buried utilities: (651) 454-0002 or
(800) 252-1166. www.gopherstateonecall.org.

All signs shall be designed to withstand 3-second wind gusts of 115 mph.

All reinforcing steel shall have 3" of concrete cover provided.

Wood exposed to ground, exposed to weather, located on concrete, or within 6" of grade, shall be a naturally durable wood (redwood, cedars, etc.) or approved treated lumber.

Caulk all building penetrations created by sign attachment hardware.

Commercial Sign – General Scope of Work

Answer all questions and submit with your permit application.

Is this a free-standing sign higher than 7 feet above grade? Yes No Will the sign be attached to a building, but not to the structural frame? Yes No Does any sign component attached to the structure weigh over 50 lbs? Yes No No
you answered <u>Yes</u> to any of the above, <u>engineered plans</u> are required and you do not
ed to continue filling out this worksheet
If the sign is free-standing (not attached to an existing structure):
Footing Diameter: Depth: Post Size:
Provide sign dimensions:
Provide attachment details to posts or building (include fastener types, sizes):
Provide the weight of each independent component or section:
Provide information on the sign material (stone, wood, plastic, aluminum, glass):

9. Provide a drawing identifying sign attachment, location, and elevations along with this worksheet.

2415 Wilshire Blvd Mound, MN 55364 Phone 952-472-0607 Fax 952-472-0620

Supplemental Information for Building Permits Indigenous Mounds and Earthwork Sites

Indigenous burial mounds and/or earthwork sites have been discovered in and around the City of Mound. While many of the sites have been severely impacted by development over the years, they do receive protection under state law. **Penalties will be imposed for the unauthorized disturbance of indigenous sites**. Additional information may be obtained through the Minnesota State Archeologist.

Any formal investigation of a site, including a determination of whether a mound or burial area exists on a subject site, is the responsibility of the property owner or developer. The issuance of permits by the City of Mound to do work on a site <u>does not</u> relieve the owner or developer of that responsibility.
